- **main** : Main parameters :
  - **endPoint** : EndPoint of the TripleStore (url where requests are sent).
  - **tripleStore** : Type of the TripleStore (possible values : WIKIDATA, DATA_BNF ou CIDOC_CRM).
  - **dataFileUrl** : File containing predefined queries (saved in query bar).
  - **queryInEndPointLink** :Link to Triplestore Endpoint to execute the query (defines the link to the triplestore from the query menu) - Leave blank to disable the link.
  - **typeUri** : Name of the link corresponding to the data type.
  - **subclassUri** : Name of the link corresponding to the subclasses (leave blank to deactivate the subclasses).
  - **nodeFilterDateEnable** :Defined whether it is possible to create Date Filter nodes.
  - **limit** : Default recovered element limit value (null for no limit).
  - **displayLabel** : Defined if labels are retrieved automatically (only works for WIKIDATA).

- **langParams** : Settings related to the language configuration.
  - **default** : Default language.
  - **select** : Lists the languages with their icons.
  - **query** : Defines the languages used in the queries (only works for WIKIDATA).

- **Prefix** : Lists the predefined prefixes :
  - **clé** : Prefix key.
  - **Valeur** : Uri corresponding to the prefix.

- **wikidataSearch** : Wikidata search parameter (only for the Wikidata triplestore).
  - **nbResult** : Maximum number of results retrieved.
  - **langage** : Langues de la recherche correspondant au paramétrage de la langue.

- **nodeTypes** : Definition of predefined values for "Element" type nodes.

- **nodeData** : Definition of predefined values for "Data" type nodes.

- **infos** : Information menu settings (icons in the top right corner).
  - **homePage** : Home page of the site
  - **ContactUrl** : Url of the contact page.
  - **helpUrl** : Url of the help page.

- **searchAndListDisplayState** : Defines whether search and list actions are displayed.
  - **node** :
    - **element** :
      - **search** : Search on "Element" type nodes.
      - **list** : Predefined list for "Element" type nodes.
    - **data** :
      - **search** : Search on nodes of type "Data".
      - **list** : Predefined list for "Data" type nodes.
    - **edge** :
      - **fixed** :
        - **list** : List of possibilities for "Fixed" type links.

- **edgesValuesByElementNodeType** : Possible values of the links automatically retrieved from the node type.
